

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/781,253
Attorney Docket No. Q63086

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (original): A user's request reflecting design system for timely and accurately reflecting users' requests on a product, comprising:
 - design data publicizing means for publicizing design data to users through a computer network;
 - correction data receiving means for receiving and storing correction data as said design data corrected by a user through said computer network; and
 - design assisting means for reflecting said correction data received by said correction data receiving means on product design.
2. (original): The user's request reflecting design system as set forth in claim 1, wherein said design data is three-dimensional data.
3. (original): The user's request reflecting design system as set forth in claim 1, wherein said design data publicizing means including public design data prepared in advance to be publicized among said design data, an editing program file for editing said public design data, and

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/781,253
Attorney Docket No. Q63086

a design data publicizing processing unit responsive to a request from a terminal connected to said computer network for transferring said public design data and said editing program file to said terminal.

4. (original): The user's request reflecting design system as set forth in claim 1, wherein said design data publicizing means including public design data prepared in advance to be publicized among said design data, an editing program file for editing said public design data, and a design data publicizing processing unit responsive to a request from a terminal connected to said computer network for transferring said public design data and said editing program file to said terminal, and wherein said editing program file enables editing of three-dimensional data.

5. (original): The user's request reflecting design system as set forth in claim 1, wherein said correction data receiving means including a data base for registering said correction data, and a received mail processing unit for receiving an electronic mail to which said correction data is attached and registering and storing said correction data in said data base.

6. (original): The user's request reflecting design system as set forth in claim 1, wherein said design data publicizing means including

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/781,253
Attorney Docket No. Q63086

public design data prepared in advance to be publicized among said design data,
an editing program file for editing said public design data, and
a design data publicizing processing unit responsive to a request from a terminal
connected to said computer network for transferring said public design data and said editing
program file to said terminal, and

said correction data receiving means including
a data base for registering said correction data, and
a received mail processing unit for receiving an electronic mail to which said correction
data is attached and registering and storing said correction data in said data base.

7. (original): The user's request reflecting design system as set forth in claim 1, wherein
said correction data receiving means including
a data base for registering said correction data, and
a received mail processing unit for receiving an electronic mail to which said correction
data is attached and registering and storing said correction data in said data base,
said received mail processing unit
classifying said correction data attached and registering said correction data in said data
base based on personal information of a user recited in said electronic mail.

8. (original): The user's request reflecting design system as set forth in claim 1, wherein
said design data publicizing means including

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/781,253
Attorney Docket No. Q63086

public design data prepared in advance to be publicized among said design data,
an editing program file for editing said public design data, and
a design data publicizing processing unit responsive to a request from a terminal
connected to said computer network for transferring said public design data and said editing
program file to said terminal, and
said correction data receiving means including
a data base for registering said correction data, and
a received mail processing unit for receiving an electronic mail to which said correction
data is attached and registering and storing said correction data in said data base,
said received mail processing unit
classifying said correction data attached and registering said correction data in said data
base based on personal information of a user recited in said electronic mail.

9. (currently amended): The user's request reflecting design system as set forth in
claim 1, wherein
said design data publicizing processing unit including
information entry selecting means allowing a user to select either information entry in the
form of a menu or transfer of said public design data and [[said]] an editing program file.

10. (original): The user's request reflecting design system as set forth in claim 1, wherein
said correction data receiving means including

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/781,253
Attorney Docket No. Q63086

a data base for registering said correction data, and
a received mail processing unit for receiving an electronic mail to which said correction data is attached and registering and storing said correction data in said data base, and
in creation of said design data by said design assisting means, said correction data registered in said data base is used.

11. (original): A user's request reflecting design method of timely and accurately reflecting users' requests on a product, comprising the steps of:
publicizing design data to users through a computer network;
receiving correction data as said design data corrected by a user through said computer network; and
reflecting said correction data received on product design.

12. (original): The user's request reflecting design method as set forth in claim 11, wherein
said design data publicizing step including the step of
in response to a request from a terminal connected to said computer network, transferring public design data prepared in advance to be publicized among said design data and an editing program file for editing said public design data to said terminal.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/781,253
Attorney Docket No. Q63086

13. (original): The user's request reflecting design method as set forth in claim 11,
wherein

 said correction data receiving step including the step of
 receiving an electronic mail to which said correction data is attached and registering said
 correction data in a data base for registering said correction data.

14. (original): The user's request reflecting design method as set forth in claim 11,
wherein

 said design data publicizing step including the step of
 in response to a request from a terminal connected to said computer network, transferring
 public design data prepared in advance to be publicized among said design data and an editing
 program file for editing said public design data to said terminal, and
 said correction data receiving step including the step of
 receiving an electronic mail to which said correction data is attached and registering said
 correction data in a data base for registering said correction data.

15. (currently amended): The user's request reflecting design method as set forth in
claim 11, wherein

 said correction data receiving step including the steps of
 receiving an electronic mail to which said correction data is attached, and

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/781,253
Attorney Docket No. Q63086

classifying said correction data attached and registering said correction data in [[said]] a data base based on personal information of a user recited in said electronic mail.

16. (currently amended): The user's request reflecting design method as set forth in claim 11, wherein

 said design data publicizing step including the step of
 in response to a request from a terminal connected to said computer network, transferring
 public design data prepared in advance to be publicized among said design data and an editing
 program file for editing said public design data to said terminal, and
 said correction data receiving step including the step of
 receiving an electronic mail to which said correction data is attached, classifying said
 correction data attached and registering said correction data in [[said]] a data base based on
 personal information of a user recited in said electronic mail.

17. (original): A server of a user's request reflecting design system for timely and
 accurately reflecting users' requests on a product, comprising:

 design data publicizing means for publicizing design data to users through a computer
 network; and

 correction data receiving means for receiving correction data as said design data
 corrected by a user through said computer network and storing said correction data so as to be
 usable by design assisting means for reflecting said correction data on product design.

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/781,253
Attorney Docket No. Q63086

18. (original): The server of a user's request reflecting design system as set forth in claim 17, wherein

 said design data publicizing means including
 public design data prepared in advance to be publicized among said design data,
 an editing program file for editing said public design data, and
 a design data publicizing processing unit responsive to a request from a terminal
connected to said computer network for transferring said public design data and said editing
program file to said terminal.

19. (original): The server of a user's request reflecting design system as set forth in claim 17, wherein

 said correction data receiving means including
 a data base for registering said correction data, and
 a received mail processing unit for receiving an electronic mail to which said correction
data is attached and registering and storing said correction data in said data base.

20. (original): The server of a user's request reflecting design system as set forth in claim 17, wherein

 said design data publicizing means including
 public design data prepared in advance to be publicized among said design data,
 an editing program file for editing said public design data, and

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/781,253
Attorney Docket No. Q63086

a design data publicizing processing unit responsive to a request from a terminal connected to said computer network for transferring said public design data and said editing program file to said terminal, and

said correction data receiving means including

a data base for registering said correction data, and

a received mail processing unit for receiving an electronic mail to which said correction data is attached and registering and storing said correction data in said data base.

21. (original): The server of a user's request reflecting design system as set forth in claim 17, wherein

said correction data receiving means including

a data base for registering said correction data, and

a received mail processing unit for receiving an electronic mail to which said correction data is attached and registering and storing said correction data in said data base,

said received mail processing unit

classifying said correction data attached and registering said correction data in said data base based on personal information of a user recited in said electronic mail.

22. (original): The server of a user's request reflecting design system as set forth in claim 17, wherein

said design data publicizing means including

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/781,253
Attorney Docket No. Q63086

public design data prepared in advance to be publicized among said design data,
an editing program file for editing said public design data, and
a design data publicizing processing unit responsive to a request from a terminal
connected to said computer network for transferring said public design data and said editing
program file to said terminal, and

said correction data receiving means including
a data base for registering said correction data, and
a received mail processing unit for receiving an electronic mail to which said correction
data is attached and registering and storing said correction data in said data base,
said received mail processing unit
classifying said correction data attached and registering said correction data in said data
base based on personal information of a user recited in said electronic mail.

23. (original): The server of a user's request reflecting design system as set forth in claim
17, wherein

said design data publicizing processing unit including
information entry selecting means allowing a user to select either information entry in the
form of a menu or transfer of said public design data and said editing program file.

24. (previously presented): The user's request reflecting system as set forth in claim 1,
wherein

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Application No. 09/781,253
Attorney Docket No. Q63086

an electronic mail, to which said correction data is attached, is received at said correction data receiving means, said electronic mail comprising personal information of the user.

25. (previously presented): The user's request reflecting design method as set forth in claim 11, further comprising:

receiving an electronic mail to which said correction data is attached, said electronic mail comprising personal information of the user.

26. (previously presented): The server of a user's request reflecting design system as set forth in claim 17, wherein

an electronic mail, to which said correction data is attached, is received at said correction data receiving means, said electronic mail comprising personal information of the user.
